Value Delivered

Our Values

- ➔ Listening to Customer- To Listen, Advice and Support our Customers so that their success becomes ours.
- ➔ Respect & Diversity- Our Employees are contributing and supporting members as a team.
- ➔ Innovation- we cultivate the freedom of entrepreneurship that stimulates our creativity and our ability to Innovate
- ➔ Professionalism – It is through our knowledge of the profession our demand for quality and transparency and the respect for our commitments that we earn and maintain the trust of our customers.
- ➔ Simplicity- It is the pursuit of simple and straight forward professional relationships based on listening.

KORA
Engineered Joint System

www.commdel.in

Product Description-

The armored Joint is the most important part of the concrete floor, but it was also the weakest part until KORA revolutionized both technologies. Today's Industrial Floors require proper and precise design calculations. Unfortunately, Load transfer capacity at joints have not been totally realized nor accounted for in most design. We control Dynamic and Static Loads to ensure that the joints are as solid as the floor.

Our Products

1. UniEdge Armour Joint-

- Standardized design state of the art manufacturing unit.
- Edge Protection with alloy grade steel strips.
- Performance based Expansive movement.
- Designed, Engineered and manufactured for closer tolerance.
- Ease in installation at site.

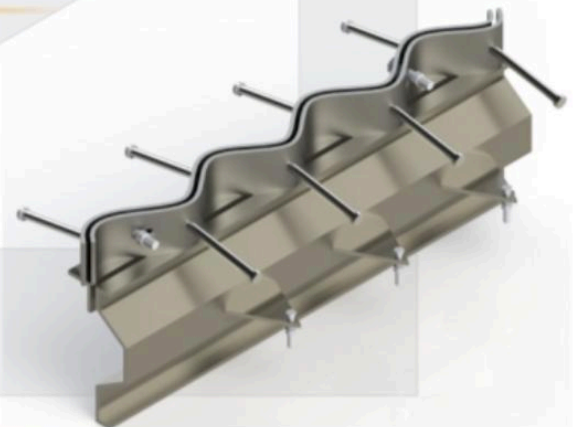

2. Shieldt Joint-

- Customized design for Heavy Duty movement on the floor.
- Sine wave profile for effective MHE movement.
- Toughened thick top plate for abused movement.
- Designed, Engineered and machined for closer tolerance.
- In built system for easy installation.

3. Unicorn Joint-

- Customized design for Heavy Duty Movement on the floor.
- Wave profile prevents impact damage and protects edge.
- Reduce noise and vibrations impact on forklift.
- Designed, Engineered and machined for closer tolerance.
- In built system for easy installation.

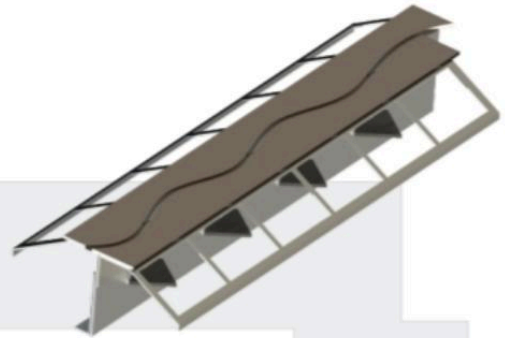

4. Sinwave Joint-

- Customized design for Heavy Duty Movement on the floor.
- Best Load Transferring System.
- Optimal Operational Efficiency.
- Less expense in the future on armoured joints and concrete floor maintenance.
- Reduce noise and vibrations impact on forklift.

5. Wave Joint-

- Customized design for Heavy Duty Movement on the floor.
- Protect Joints from damage in highly stressed concrete floors.
- Reduce vibrations and noise for MHE movements.
- Suitable for directional traffic solutions.
- In built system for easy Installation.

6. UniEdge R Joint-

- Robust design for all repair solutions.
- Customized design to suit to repair material.
- Toughened material to suit to abused movement on repair area.

7. UniCorn R Joint-

- Robust design for all repair solutions.
- Customized design to suit to repair material.
- Heavy loading design for critical movement.

8. Shrinko SRA Floor-

- Innovative solution for compensating Drying shrinkage in concrete.
- Specially designed for casting large panel area.
- Designed for miniscule dosage with effective results.

9. Braiden (Lithium Silicate)-

- Specially researched and manufactured for best penetrative value.
- Best spread for better outcome.

10. Diamond Dowels -

- High tensile steel for load transfer
- Stricter in-built manufacturing quality control
- Designed for smoother movement
